Leading the Way in
Technology Solutions

The Go-To Source for Innovative Solutions

At Arab Link Technology, we specialize in providing end-to-end technical solutions for residential and commercial needs. Our team of experienced professionals is dedicated to providing customers with the best products and services to meet their specific needs and budget.

We are proud to partner with the leading providers of the best technology solutions available on the market, so that our customers can get the most out of their investments. Our team also has extensive knowledge in the area of integrated solutions, which allows us to offer a comprehensive range of services.

At Arab Link Technology, we strive to provide our customers with the best possible experience, always keeping their needs and budget in mind. We are committed to providing the best service and solutions to ensure customer satisfaction.

Our Mission & Vision

Mission

Our mission at Arab Link Technology is to provide our customers with the best technical solutions and services to meet their residential and commercial needs. We strive to create innovative solutions, utilizing the latest technology, to help our customers achieve their goals.

Vision

Our vision is to be the leading provider of integrated solutions for residential and commercial needs. We aim to be the go-to source for customers seeking the best in technological innovations and customer service. We are dedicated to creating an exceptional experience for all of our customers and partners.

Our Best Service

Integrated Solutions for Every Need

SECURITY & SURVEILLANCE

- CCTV System
- Access Control System
- Time Attendance System
- Public Address System
- Automatic Gates & Doors
- Network Security

IT INFRASTRUCTURE

- Enterprises LAN & WAN
- Enterprises Wireless

SECURITY & SURVEILLANCE

VIDEO SURVEILLANCE SYSTEM

We design, install, maintain and upgrade a wide range of High Definition IP and Analog Video Surveillance Solutions to meet customer's specific needs and budgets, from large commercial enterprise to home security platforms, from simple camera system for small offices and businesses to complex solutions for urban traffic management system.

ACCESS CONTROL SYSTEM

Employee attendance monitoring systems have come a long way. We provide biometric and RFID based attendance system that uses tags or organic markers to track time & movement of the employees within office premises.

TIME ATTENDANCE SYSTEM

Ever wonder how to reduce labour costs? Control the efficiency of your labour by installing this system. Biometric time and attendance systems use the and fingerprints of employees to verify who is actually clocking in and clocking out of work each day. The system scans the finger of the employee, coordinates are determined and the system maps the endpoints and intersections of the fingerprint.

PUBLIC ADDRESS SYSTEM

Educational institutions, residential complexes, offices find it easier to have a PA system in place so announcements can be heard across the desired perimeter. With Arab link Technology, the right system can be installed to get the word across without any hassle.

AUTOMATIC SLIDING DOORS

If privacy, safety and comfort are a prime concern of yours, an automatic gate system is a great investment. An automated gate makes you life more comfortable ,easy and beautiful. Forget the inconvenience of having to open and close your gate manually; with one simple movement you can operate it from the comfort of your home or car.

NETWORK SECURITY

We provide complete turnkey advance network security solutions includes VPN, NAC, Firewall, IPS & IDS. Which aim to counteract modern day security threat as the primary and secondary line of defense. The advance network security solutions are predominantly aimed at providing perimeter level and data center security, our network security solutions cover all business and technical needs for network level protection with advance application threat intelligence.

IT SETUP & IT INFRASTRUCTURE

ENTERPRISE LAN & WAN

We ensure sustainable Local Area Network and Wide Area Network for inter-connectivity within the working environment. Data security is critical and with our expertise, Enterprise LAN/WAN solutions can be seamlessly merged with other relevant options for maximizing organizational security.

ENTERPRISE WIRELESS NETWORKS

We build high performance, enterprise class wireless networks including Campus Wi-Fi, Wi-Fi hotspot, Point to Point and Point to Multi Point for modern businesses that rely on workforces, their business systems and technology to stay connected. From wireless network infrastructure hardware to professional services including installations and configurations, we build Wireless LAN systems that are the backbone behind the modern, mobile employees daily workflow.

SERVER & STORAGE

We offer flexible server and storage solutions by integrating multivendor server and storage technologies with networking, security, power, cooling and cloud into shared pools of interoperable resources. Our highly skilled converged solution architecture and implementation engineers understand every phase of a server and storage infrastructure management from design, architecture and installation to integration and consolidation.

BACKUP & RECOVERY

We ensure use of the latest backup software for consumers, small- medium businesses and enterprises that include physical, virtual and cloud based backup and storage to safeguard your critical data. They also drive operational efficiencies by reducing backup time, improving data recovery and reducing operational expenses.

TELEPHONY & PABX SYSTEM

We have a range of PABX systems, including traditional on-site PABXs or off-site Visual PABXs using normal PSTN telephone lines, VoIP or both. When it comes to business phones, finding the right solution to fit your business requirements can be difficult. Use IP phones and ship the second network. If you're just starting out and haven't wired your new office yet, you can save even more by using Driven Technologies PABX Telephony Solution with IP telephones.

STRUCTURED CABLING

A structured cabling system is a complete system of cabling and associated hardware, which provides a comprehensive telecommunications infrastructure. This infrastructure serves a wide range of uses, such as to provide telephone service or transmit data through a computer network. It should not be device dependent.

ELECTRICAL SERVICES

LIGHTING

No matter if its in a room, office, or outdoor area. We have experience in lighting design as well as installation

SWITCH UPGRADE

Your expensive electronic equipment and gadgets may be at risk to an unexpected power surge

ELECTRICAL TESTING
